Language Management Rules

Each publication item (in a given language) of type « book » or « periodical » has a page on oecd.org.

Monolingual:

The metadata are displayed in the language of the content, independently of the interface. Publications can be visualized on either the English or the French interface. The metadata are the same between the two interfaces, only the labels differ.

e.g. a publication item in English is visible on both the English and French interfaces with the same metadata (in English) but different labels (English or French).

Bilingual:

option 1: For bilingual publications, the metadata are displayed in both languages, independently of the interface language.

option 2: For bilingual publications, the metadata are displayed in English on the English interface, and in the second language on the French interface. To see the metadata in the other language, users must change the interface language.

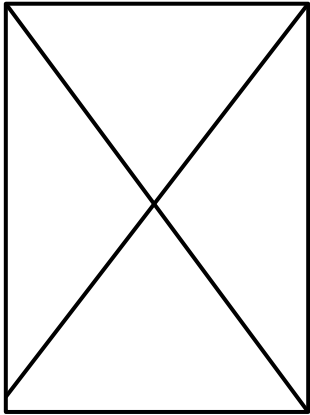

En Interface vs FR Interface

The following slides present the display of books and periodicals on the English interface. On the French interface, labels should be translated according to the list provided on slide #64.

Standard page for the display of metadata for all publication items having the item-type « book »

Greening Household Behaviour

The Role of Public Policy

Published on 07/03/2011

Also available in [French](#)

Household consumption patterns and behaviour have an impact on stocks of natural resources, environmental quality and climate change. This is expected to increase significantly in the future. In response, governments have introduced a variety of measures to encourage people to take into consideration the environmental impact of their purchases and practices. These may include environmentally related taxes, energy performance standards for homes, carbon dioxide emission labels for cars, and financial support to purchase solar panels, among others. Nevertheless, understanding and influencing household behaviour remains a challenge for policy makers.

This publication presents the main results and policy implications of an OECD survey of more than 10 000 households in 10 countries: Australia, Canada, the Czech Republic, France, Italy, Korea, Mexico, the Netherlands, Norway and Sweden. It offers new insight into what policy measures really work, looking at what factors affect people's behaviour towards the environment, energy use, personal transport choices, organic food consumption, and waste generation and recycling.

print

The informal sector deprives states of revenues and workers of social protection. It also, however, frequently constitutes the most dynamic part of the economy and creates massive employment. Informal employment is ubiquitous and growing. The financial crisis that began in 2008 has made the management of informal employment even more challenging. Responding to this emerging challenge is critical, not only for the well being of millions of workers but also for social development. *Is Informal Normal?* provides evidence for policy makers on how to deal with this issue of crucial importance for developing and developed countries alike. This book includes StatLinks, URLs linking charts and graphs to Excel files containing the data.

OECD Environmental Performance Reviews: Portugal 2011

Published on 10/11/2011

Also available in [French](#)

[READ this book](#)

[BUY this book](#)

Tweet

send

print

This report presents the OECD review of Portugal's environmental policy performance for 2011. It finds that environmental policies have been consolidated and strengthened since the last review in 2001, but that meeting the post-Kyoto targets for reducing greenhouse gas emissions will be challenging. With energy and climate policies being closely related, the report points out that with less than 50% of hydro capacity currently being exploited, there is potential for further development in that area. It also describes the challenges regarding coastal zone and marine management.

Topics covered in the report include greening growth, implementation of environmental policies, international co-operation, climate change, waste management and the 3Rs (reduce, reuse, recycle), and nature and biodiversity.

Further information about the Environmental Performance Review programme is available at www.oecd.org/env/countryreviews.

OECD Studies on SMEs and Entrepreneurship

Intellectual Assets and Innovation *The SME Dimension*

To be published on 15/12/2011

[PRE-ORDER this book](#)

This series offers policy guidance for governments to foster entrepreneurship and strengthen the performance of SMEs and their contribution to growth and development. It provides evidence-based analysis and policy recommendations on thematic issues such as access to finance for SMEs and entrepreneurs, SME participation in global markets, intellectual assets and innovation, high-growth SMEs and women's entrepreneurship. It also includes country reviews of key SME and entrepreneurship issues and policies in OECD member and non-member countries.

Contents

- Chapter 1. Intellectual asset management, innovation and SMEs
- Chapter 2. Australia: Intellectual property solutions for innovative SMEs
- Chapter 3. Italy: Channeling creativity into competitiveness
- Chapter 4. Nordic countries: Matching exceptional design and creativity with progressive policy
- Chapter 5. The United Kingdom: Intellectual asset management strategies for diverse innovations
- Chapter 6. The United States: Balancing robust protection with rapid innovation

OECD Reviews of Labour Market and Social Policies: Russian Federation 2011

To be published on 12/12/2011

Also available in [Russian](#)

[PRE-ORDER this book](#)

The global financial crisis interrupted a protracted period of strong economic growth in the Russian Federation. Despite a large decline in output, job losses and hikes in unemployment remained rather modest, and much of the labour market adjustment took place through reduced working hours and, in particular, real wages. Notwithstanding the recent recovery, the Russian labour market remains characterised by significant structural imbalances resulting in widespread segmentation and large earnings inequalities.

To improve the balance between labour market flexibility and the protection of workers, the Russian Federation needs to reinforce its labour market institutions. Poverty and income inequalities remain well above the OECD average. Family policy is focused on increasing birth rates, but is ineffective in reducing poverty as working adults and children make up 60% of the poor. Instead, social policy is focused on the elderly and disabled, and in recent years there has been significant increases in transfer payments to pensioners.

Recent reform is likely to “eradicate” poverty among pensioners, as more attention is given to the long-term financial sustainability of the private pensions system. The reform also aims to raise the low standard pensionable ages in Russia and limit access to early retirement. The reform is also moving towards more effective support for parents to combine work and family life.

Abstract

This publication provides comments and illustrations of standards in force regarding the classification, presentation and marking of citrus fruit in international trade under the Scheme for the Application of International Standards for Fruit and Vegetables set up by OECD in 1962. It is a valuable tool for both the Inspection Authorities and professional bodies responsible for the application of standards or interested in trade in citrus fruit. The book includes a USB key with the electronic version of the publication.

Résumé

Cette publication contient des commentaires et des illustrations des normes en vigueur concernant la classification, la présentation et le marquage des agrumes dans le cadre du Régime de l'OCDE pour l'Application de normes internationales aux fruits et légumes créée en 1962. Elle constitue un outil précieux tant pour les services de contrôle que pour les milieux professionnels responsables de l'application des normes ou s'intéressant au commerce international des agrumes. La brochure comprend également une clef USB contenant une version électronique de la publication.

Abstract

Discussions on pension policy are often unnecessarily complicated by misunderstandings over basic definitions. Therefore, one of the first tasks of the OECD Working Party on Private Pensions was the creation of a classification of private pension systems that was applicable worldwide. The classification contains a separate glossary of terms used in the private pensions field. These definitions have been approved by the 30 member governments of the OECD through their representatives to the Working Party on Private Pensions. This publication is a practical tool for government pension officials, academic and business communities, and journalists worldwide. It is hoped that it will contribute to mutual understanding, one of the key objectives of the OECD's work.

Résumé

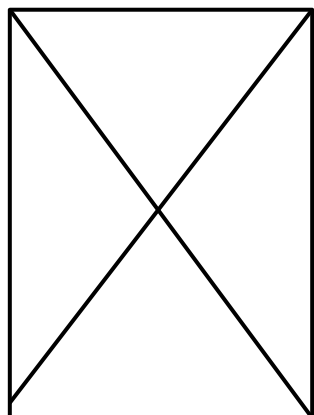

Les discussions sur les systèmes de pension sont souvent rendues inutilement compliquées par une mauvaise compréhension des concepts de base. C'est pourquoi l'une des premières tâches à laquelle s'est attelé le Groupe de travail de l'OCDE sur les pensions privées a été l'établissement d'une typologie des systèmes de pension privés qui puisse s'appliquer partout dans le monde. Cette typologie s'accompagne d'un glossaire des termes utilisés dans le domaine des pensions privées. Ces définitions ont été approuvées par les 30 gouvernements membres de l'OCDE, par l'intermédiaire de leurs représentants au Groupe de travail sur les pensions privées. Cette publication se veut un outil pratique pour les responsables gouvernementaux des politiques de pensions, pour les universitaires et pour les entreprises, ainsi que pour les journalistes dans le monde entier. Elle contribue à la compréhension mutuelle, ce qui est l'un des grands objectifs des travaux de l'OCDE.

This fact-filled annual reference book brings the reader the latest available economic information for most of the economies of Africa. Drawing on the expertise of both the African Development Bank and the OECD, it opens with an overview that examines the international environment, macroeconomic performance, progress towards attaining the Millennium Development Goals, and governance and political issues. The second part provides individual country reports for 30 countries. Each country report provides an assessment of recent economic performance, economic projections, an examination of structural issues, and a discussion of the political and social context. The statistical annex presents 24 tables comparing economic and social variables across all the countries of Africa.

The Global Forum on Transparency and Exchange of Information for Tax Purposes's annual assessment of the legal and regulatory systems for the exchange of information in tax matters. This year's edition covers more than 90 jurisdictions, including all OECD and G20 countries as well as all of the world's major financial centres. New additions this year are Botswana, Brazil, Jamaica, Indonesia, Liberia and Qatar.

For each jurisdiction, the report sets out information on agreements that meet the international standard for information exchange in tax matters; access to bank information for tax purposes; access to ownership, identity and accounting information; and availability of ownership, identity and accounting information relating to companies, trusts, partnerships and foundations.

The *OECD Economic Outlook* is the OECD's twice-yearly analysis of the major economic trends and prospects for the next two years. Prepared by the OECD Economics Department, the *Outlook* puts forward a consistent set of projections for output, employment, prices and current balances based on a review of each member country and of the induced effect on each of them on international developments.

Coverage is provided for all OECD member countries as well as for selected non-member countries. Each issue includes a general assessment, chapters summarising developments and providing projections for each individual country, three to five chapters on topics of current interest, and an extensive statistical annex. Subscribers to the print edition also have access to an online edition, published on the internet six to eight weeks prior to the release of the print edition. In addition to the usual macroeconomic and country assessments and statistical annex with projection data, this issue of the *OECD Economic Outlook* also includes special chapters on the persistence of high unemployment and drivers and vulnerabilities associated with international capital flows.

The monthly *Main Economic Indicators (MEI)* presents comparative statistics that provide an overview of recent international economic developments for the 34 OECD countries, the euro zone and a number of non-member economies.

This indispensable and unique source of key short-term statistics is a vehicle for analysis for corporate planners, economists, academics, researchers and students. Using the most up-to-date, user-friendly tabular presentation, the indicators cover national accounts, business surveys and consumer opinions, leading indicators, retail sales, production, construction, prices, employment, unemployment, wages, finance, international trade and balance of payments.

Abstract

This annual edition of *Labour Force Statistics* provides detailed statistics on population, labour force, employment and unemployment, broken down by gender, as well as unemployment duration, employment status, employment by sector of activity and part-time employment. It also contains participation and unemployment rates by gender and detailed age groups as well as comparative tables for the main components of the labour force. Data are available for each OECD Member country and for OECD-Total, Euro area and European Union. The time series presented in the publication cover 20 years for most countries. It also provides information on the sources and definitions used by Member countries in the compilation of those statistics.

Résumé

L'édition annuelle des Statistiques de la population active fournit des statistiques détaillées sur la population, la population active, l'emploi et le chômage, décomposées par sexe, situation dans la profession et secteur d'activité; il y a aussi des séries sur la durée du chômage et le travail à temps partiel. Pour chaque pays, les taux d'activité et de chômage sont ventilés par sexe et tranche d'âge. Des tableaux comparatifs permettent d'analyser les principales composantes de la population active. Les données y sont disponibles pour chaque pays Membre de l'OCDE et pour OCDE-Total, Zone euro et l'Union Européenne. Les séries chronologiques présentées sont disponibles sur vingt ans pour la plupart des pays. Cette édition comprend également des informations sur les sources et définitions qu'utilisent les pays Membres pour compiler ces statistiques.

NB: broken up into chapters ; does not have multilingual summaries.

Abstract

Governments are major issuers of debt instruments in the global financial market. This volume provides central government debt instruments for the 31 OECD member countries to meet the analytical requirements of policy makers, debt management experts and market analysts. Statistics are presented according to a comprehensive standard framework to allow cross-country comparison. Country methodological notes provide information on debt issuance in each country as well as on the institutional and regulatory framework governing debt management policy and selling techniques.

Résumé

Les gouvernements sont parmi les principaux émetteurs de titres d'emprunt sur le marché mondial des capitaux. Le présent volume fournit des informations quantitatives sur les titres d'emprunt d'État pour les 31 pays membres de l'OCDE en vue de répondre aux besoins analytiques des utilisateurs tels que les pouvoirs publics, les spécialistes de la gestion de la dette et les analystes de marché. Les statistiques sont présentées selon un plan d'ensemble normalisé pour permettre une comparaison entre les différents pays. Les notes méthodologiques par pays donnent des informations sur les émissions de titres d'emprunt dans chacun des pays, ainsi que sur le cadre institutionnel et réglementaire dans lequel s'inscrivent la politique de gestion de la dette et les techniques de vente.

Abstract

This biannual publication provides a set of indicators that reflect the level and structure of the efforts undertaken by OECD member countries and seven non-member economies (Argentina, China, Romania, Russian Federation, Singapore, South Africa, Chinese Taipei) in the field of science and technology. These data include final or provisional results as well as forecasts established by government authorities. The indicators cover the resources devoted to research and development, patent families, technology balance of payments and international trade in R&D-intensive industries. Also presented are the underlying economic series used to calculate these indicators. Series are presented for a reference year and for the last six years for which data are available.

Résumé

Cette publication semestrielle présente un jeu d'indicateurs reflétant le niveau et la structure des efforts menés par les pays de l'OCDE et par sept économies non membres (Afrique du Sud, Argentine, Chine, Fédération de Russie, Roumanie, Singapour, Taipei chinois) dans les domaines de la science et de la technologie. Il s'agit de résultats définitifs ou provisoires, et de prévisions établies par les gouvernements. Les indicateurs couvrent plus particulièrement les ressources consacrées aux activités de recherche-développement, les familles de brevets, la balance des paiements technologiques et le commerce international dans les industries intensives en R-D. Cet ouvrage intègre également quelques statistiques économiques de base utilisées pour le calcul des indicateurs. Les séries couvrent une année de référence et les six dernières années pour lesquelles les données sont disponibles.

Abstract

This publication provides up-to-date, detailed quarterly statistics on oil, coal, natural gas and electricity for the OECD countries. Oil statistics cover production, trade, refinery intake and output, stock changes and consumption for crude oil, NGL and nine selected oil product groups. Statistics for electricity, natural gas and hard coal and brown coal show supply and trade. Import and export data are reported by origin and destination. Moreover, oil and hard coal production are reported on a worldwide basis.

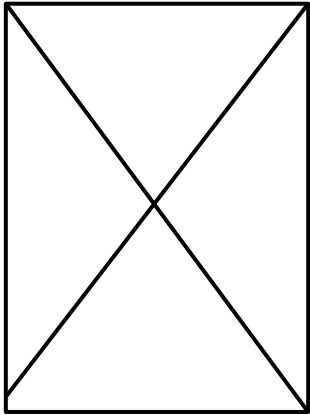

Résumé

Cette publication présente des statistiques actualisées, précises et détaillées sur le pétrole, le gaz naturel, le charbon et l'électricité pour les pays de l'OCDE. Les statistiques du pétrole couvrent la production, les importations et les exportations, l'approvisionnement et la production des raffineries, les variations de stocks ainsi que la consommation de pétrole brut, de LGN et de neuf produits pétroliers sélectionnés. Les statistiques de l'électricité, du gaz naturel et du charbon concernent la production et les échanges. Les importations et exportations sont présentées par pays d'origine et de destination. De plus, les productions de pétrole et de charbon sont étendues à l'ensemble du monde.
